

The logo for HS-BOX basic, featuring the text "HS-BOX" in a stylized blue and red font, with the word "basic" in a smaller, lowercase blue font to the right.

# The clever choice:

## HS-BOX basic

**HS-BOX basic** on the flatbed of your truck is the intelligent alternative to a home-crafted wooden box. From now on it is no longer necessary to drill through thick timber to make a place to transport your tools and materials.

The **HS-BOX basic** is an assembly kit made up of 6 precision components that fit together perfectly and are simple to build. All you need is a normal rivet gun.

**Unpack – Assemble – Position on Truck – Load  
And off you go**

Make the comparison: calculate how long your employees need to build a wooden crate and the price of materials for making a »cheap« box of wood.
